

# PRD-006 — Practice Session

**Product:** PrepHub V2

**Status:** Approved

**Depends on:**

- PRD-000 — Design System
- PRD-001 — Authentication
- PRD-005 — Practice

**Related Documents**

- PRD-007 — Session Review & Results
- 

## 1. Purpose

The Practice Session is where students complete PrepHub's adaptive learning experience.

Students work through one question at a time inside a 21-question adaptive session.

The Practice Session should maximize learning while minimizing distractions, allowing students to focus entirely on solving SAT questions and understanding their mistakes.

---

## 2. Product Philosophy

The Practice Session follows four core principles.

### 2.1 One Question at a Time

Students should only focus on a single question.

The interface should never overwhelm students with unnecessary information or multiple questions simultaneously.

---

## 2.2 Learn Immediately

Students learn most effectively when feedback is immediate.

After every submitted question, PrepHub immediately explains the correct solution while the student's reasoning is still fresh.

---

## 2.3 Preserve Session Integrity

Although students receive immediate feedback after every question, their overall PrepHub Score Prediction is not updated until the adaptive session has been completed.

This allows students to learn continuously without compromising the adaptive evaluation.

---

## 2.4 Frictionless Experience

Students should spend their mental effort solving SAT questions—not navigating the application.

Every interaction should feel simple, predictable, and fast.

---

# 3. Goals

The Practice Session must:

- Present one SAT question at a time.
  - Minimize distractions.
  - Provide immediate learning feedback.
  - Preserve adaptive session integrity.
  - Support seamless continuation across devices.
  - Closely resemble the Digital SAT testing experience where appropriate.
- 

# 4. Non-Goals

This PRD does not define:

- Adaptive question selection
  - Session generation
  - SAT score prediction
  - Session summaries
  - Dashboard behavior
  - Progress analytics
- 

## 5. Session Layout

Each Practice Session displays:

- Session progress
- Question number
- Progress bar
- Recommended timer
- Question content
- Answer choices
- Navigation controls

Only one question is visible at any time.

---

## 6. Progress

The top of the screen displays:

Question **X** of **21**

A visual progress bar accompanies the question number.

Students should always understand how much of the session remains.

---

## 7. Recommended Timer

Each question displays a recommended completion time.

Example:

**Recommended Time**

1:15

The timer counts downward toward the recommended time.

If the timer reaches zero:

A notification informs the student that they have exceeded the recommended time.

Example:

You've exceeded the recommended time for this question.

Students may continue working without interruption.

The timer exists to build pacing awareness rather than enforce strict time limits.

---

## 8. Question Display

Each question occupies the primary content area.

Question types may include:

- Reading passages
- Grammar questions
- Vocabulary questions
- Algebra
- Geometry & Trigonometry
- Advanced Math
- Problem Solving & Data Analysis

The layout should automatically adapt to each question type.

---

## 9. Reading Questions

Reading passages remain visible while students answer associated questions.

Students should never need to repeatedly reopen or scroll excessively to reference the passage.

The reading experience should resemble the Digital SAT.

---

## 10. Images & Figures

Graphs, diagrams, tables, and figures should display clearly.

When necessary, students may zoom into images for improved readability.

Image presentation should prioritize clarity over unnecessary controls.

---

## 11. Answer Submission

Students answer one question at a time.

Before submitting, students may:

- Select an answer
- Change their selected answer
- Skip the question

Once the student presses **Submit**, the answer becomes permanently locked.

Submitted answers cannot be modified.

---

## 12. Skipping Questions

Students may skip unanswered questions.

Skipped questions remain available until the adaptive session is completed.

Students may freely navigate back to unanswered questions.

A session cannot be completed while unanswered questions remain.

---

## 13. Immediate Feedback

Immediately after submission:

The question transitions into an explanation screen.

The original question remains visible for context.

PrepHub immediately displays:

- Whether the student's answer was correct
- The correct answer
- A written explanation
- A video explanation

Students receive immediate instructional feedback while the reasoning process is still fresh.

---

## 14. Explanation Screen

The explanation replaces the question-answering interface.

The explanation screen includes:

- Original question
- Student's submitted answer
- Correct answer
- Written explanation
- Video explanation
- Next Question button

Students may spend as much time reviewing explanations as desired.

---

## 15. Video Explanations

Every question includes a corresponding video explanation.

The video explanation supplements—not replaces—the written explanation.

Students may choose whether to watch the video before continuing.

Video explanations should provide:

- Complete walkthrough
  - SAT strategy
  - Common mistakes
  - Efficient solving methods where applicable
- 

## 16. Next Question

After reviewing the explanation, students continue using a prominent:

**Next Question**

button.

Advancement to the next question is always controlled by the student.

PrepHub never automatically advances after a countdown.

---

## 17. Calculator

Calculator-allowed questions provide an integrated Desmos calculator.

Students should not need to leave PrepHub to perform calculations.

The calculator experience should closely resemble the Digital SAT.

---

## 18. Autosave

PrepHub automatically saves student progress after every meaningful interaction.

This includes:

- Answer selections
- Submitted answers
- Skipped questions
- Current question
- Remaining session progress

Students returning later resume exactly where they left off.

---

## 19. Visual Design

Transitions between screens should feel smooth and responsive.

Screen transitions should occur in approximately 200–300 milliseconds.

Animations should reinforce continuity without delaying learning.

---

## 20. Audio

No sound effects are used during the Practice Session.

Correct answers, incorrect answers, and navigation remain entirely visual.

---

## 21. Keyboard & Accessibility

The Practice Session must support:

- Full keyboard navigation
- Screen readers
- High contrast compatibility
- Responsive layouts
- Accessible focus indicators

Dedicated keyboard shortcuts are not included in Version 1.

---

## 22. Themes

Students may choose between:

- Light
- Dark
- System

Theme preference applies consistently throughout PrepHub.

---

## 23. Session Integrity

Immediate explanations exist solely to maximize learning.

Adaptive evaluation occurs only after all 21 questions have been completed.

Individual question results never trigger immediate updates to:

- PrepHub Score Prediction
- Estimated SAT range
- Adaptive mastery calculations

Those updates occur exclusively during the Session Review process defined in PRD-007.

---

## 24. Acceptance Criteria

The Practice Session is complete when:

### Interface

- One question is displayed at a time.
- Progress bar is visible.
- Question number is visible.
- Recommended timer is visible.

## Navigation

- Students may skip unanswered questions.
- Students may revisit unanswered questions.
- Students cannot modify submitted answers.
- Sessions cannot finish with unanswered questions.

## Feedback

- Correctness is shown immediately.
- Correct answer is displayed.
- Written explanation is displayed.
- Every question includes a video explanation.
- Students manually advance using the Next Question button.

## Calculator

- Calculator questions provide integrated Desmos.

## Persistence

- Progress automatically saves.
- Interrupted sessions resume seamlessly.

## Accessibility

- Light, Dark, and System themes are supported.
- Interface remains fully accessible.
- Reading passages remain visible.
- Images are clearly displayed and support zoom when appropriate.

## Overall Experience

Students should feel that every question follows a consistent, predictable flow:

Solve.

Submit.

Learn.

Continue.

The interface should become almost invisible, allowing students to focus entirely on improving their SAT performance.
