

PRD-008 — Progress

Product: PrepHub V2

Status: Approved

Depends on:

- PRD-004 — Student Home Dashboard
 - PRD-005 — Practice
 - PRD-006 — Practice Session
 - PRD-007 — Session Review & Results
-

1. Purpose

The Progress page provides students with a long-term view of their improvement throughout their PrepHub journey.

Unlike the Dashboard, which focuses on current performance, or the Session Review, which focuses on a single completed session, the Progress page helps students understand how they have grown over weeks, months, or even years of consistent practice.

The page should reinforce motivation by showing that meaningful progress is built over time.

2. Product Philosophy

The Progress page exists to answer one question:

"How have I improved since I started PrepHub?"

Every feature on this page should reinforce long-term growth rather than overwhelm students with analytics.

The page should feel like a personal academic journal rather than a data dashboard.

3. Goals

The Progress page should:

- Visualize long-term SAT improvement.
 - Show progress toward the student's target score.
 - Celebrate meaningful milestones.
 - Highlight long-term study habits.
 - Identify areas needing additional attention.
 - Remind students how far they have already come.
-

4. Non-Goals

This page does not include:

- Session-by-session review.
- Question explanations.
- Current dashboard metrics.
- Mastery graphs for every subject over time.
- Accuracy trend charts.
- Time trend charts.
- Study calendar heatmaps.
- Personal records.

These belong elsewhere or do not directly help students improve.

5. SAT Prediction History

The primary feature of the Progress page is the student's SAT Prediction History.

PrepHub displays every predicted SAT score generated after each completed adaptive session.

The graph should display:

- One point per completed adaptive session.
- A continuous trend line connecting all sessions.
- Interactive points that reveal additional information when selected.

Each point includes:

- Session number
- Date completed
- Predicted SAT score

The x-axis is based on **completed adaptive sessions**, not calendar months.

This ensures the graph accurately reflects the student's learning journey regardless of whether they study daily, weekly, monthly, or intermittently over several years.

6. Target Score Progress

Students choose a target SAT score during onboarding.

PrepHub displays a visual progress bar showing progress toward that goal.

The section includes:

- Target SAT Score
- Current PrepHub Score Prediction
- Remaining estimated points to reach the target

The goal should always feel visible and attainable.

7. Your Journey

This section provides a personalized narrative summarizing the student's improvement since joining PrepHub.

Rather than presenting raw statistics alone, PrepHub automatically generates a concise story highlighting the student's progress.

Example:

You started PrepHub with a predicted SAT score of **1260–1320**.

Since then, you've completed **43 adaptive sessions**, answered **903 questions**, and improved your predicted SAT score by **180 points**.

Your greatest improvement has been **Geometry**, increasing by **19%**.

You're now within approximately **20 points** of your target score of **1500**.

The summary should update automatically as students continue practicing.

8. Milestones

PrepHub celebrates meaningful achievements throughout a student's journey.

Milestones should include both major accomplishments and smaller wins to maintain motivation.

Examples include:

Study Time

- First Hour Studied
- Five Hours Studied
- Ten Hours Studied
- Twenty-Five Hours Studied
- Fifty Hours Studied
- One Hundred Hours Studied

Questions Answered

- 100 Questions
- 250 Questions
- 500 Questions
- 1,000 Questions
- 2,500 Questions

Adaptive Sessions

- First Session
- Ten Sessions
- Twenty-Five Sessions
- Fifty Sessions
- One Hundred Sessions

Predicted SAT Score

- First 1200+

- First 1300+
- First 1400+
- First 1500+
- First 1550+

Milestones should celebrate progress rather than competition.

9. Study Statistics

PrepHub provides a concise overview of long-term study activity.

Metrics include:

- Total Study Time
- Average Session Length
- Total Questions Answered
- Total Adaptive Sessions Completed

These metrics give students a sense of the work they've invested without becoming overly analytical.

10. Weakest Skills

PrepHub identifies the student's three weakest learning categories based on long-term performance.

The section ranks the areas needing the most improvement.

Example:

1. Vocabulary
2. Geometry & Trigonometry
3. Grammar

Each recommendation should encourage focused practice and provide clear direction for future study.

11. Visual Design

The Progress page should emphasize clarity and motivation.

Visualizations should remain clean, simple, and easy to interpret.

The SAT Prediction History graph should be the primary visual element on the page.

The remaining sections should reinforce the student's journey without overwhelming them with excessive charts or statistics.

12. Acceptance Criteria

SAT Prediction History

- Displays one point for every completed adaptive session.
- Uses adaptive session count as the x-axis.
- Shows an interactive trend line.
- Selecting a point reveals:
 - Session number
 - Completion date
 - Predicted SAT score

Target Score Progress

- Displays current target score.
- Displays current predicted SAT score.
- Shows progress toward the goal using a visual progress bar.
- Indicates estimated remaining points to reach the goal.

Your Journey

- Automatically generates a personalized summary of the student's progress.
- Updates continuously as new sessions are completed.
- Highlights meaningful improvements and current standing.

Milestones

- Celebrates study time milestones.
- Celebrates questions answered milestones.
- Celebrates adaptive session milestones.
- Celebrates predicted SAT score milestones.

Study Statistics

- Displays total study time.
- Displays average session length.
- Displays total questions answered.
- Displays total adaptive sessions completed.

Weakest Skills

- Identifies the student's three weakest long-term categories.
- Updates recommendations based on continued practice.

Overall Experience

By leaving the Progress page, students should understand:

- How much they have improved.
- How much work they have invested.
- How close they are to reaching their goal.
- Which skills deserve additional attention.
- Why continuing to practice is worthwhile.
